## Evolution-Walls Care and Cleaning:

### Shiplap, Concord, Oakwalls, Hempwood

Your planks are virtually maintenance free. Normal dusting with a clean, dry cloth should be the primary cleaning method. As needed you can damp wipe using water only. Never saturate your wood walls. Slightly damp (wrung out) cloth only. Never use wax, detergents, polishes or abrasive cleaners or use oil-based products on your wall.

Hanging pictures and other wall decor: Wood planks are not load bearing. For hanging pictures and other object such as TV's, mirrors, drill clearance holes through the planks and mount objects directly to wall studs with screws or nails.
